Career Objective: To gain a position of a PHP programmer in an IT company that can provide me an opportunity to work on several projects for writing, testing, and debugging code and help the websites operate flawlessly.

Area of Expertise:

- Commercial Experience
- Web Development
- Strong hold on Laravel Framework
- CMS Implementation (Wordpress, Joomla)
- Server Administration (Ubuntu & CentOS)
- Object Oriented Programming

Technical Skills:

- Extensive knowledge of HTML/CSS, Unix/Linux platform, Laravel framework of PHP, MySQL, jQuery, Apache Server, Nginx server, Ajax.AWS
- Poficient in using PHP Strom 7/8/9
- In-depth knowledge of programming like PHP 4.0, 5.0, PEAR, XML, AJAX, jQuery.

Education: Completed +2 in 2008 and started GNIIT from NIIT south ex dropped it after 2 nd semester because of conflicts in their teaching and my love for open source.

Work Experience:

- Worked as .NET Developer in Hawks IT Services Pvt Ltd back in 2012
 - Had to take care of internal software developments and provide training to newly joined candidates.
- Developed my own Bitcoin Exchange in 2013 (Core PHP)
 - Was built with core php and hosted on a ubuntu server, had good number of users untill one black day it was hacked.
- Worked as a contractual Laravel Developer in MyZeal IT Services(2015)
 - Was hired on a contract to complete a freelance platform for photographers.
- Worked as a full stack web developer in Krishbal Brands(webeasts.com in 2015)
 - The company turned from product based to service company, been a part of two mobile app development and did many websites with Laravel/Wordpress
- Working as a Lead Laravel Developer in Digital IP Insights Pvt Ltd
 - Takes care of a web crawler which searches for counterfeit products over the web, developed a crawler which fetches data from Google and Bing search engine.

Projects worked on:

- www.nocharge.in

This website is built with laravel 5.2. And is a service provider to let people recharge their phone pay postpaid bills and recharge their DTH Connections.

- www.acchakhana.com

This website is built with Laravel 5.2 which lets people order tiffin online.

- www.itsmuzikal.com

This website is built with Laravel 4.2 and used Bootstrap, JQuery/Ajax and little bit of angular so far. Basically this website is a collection of different APIs working on a single place, users can listen to audio songs which is buffered from soundcloud via API, user can watch search for videos and watch them because youtube API is integrated on the website, users can perform searches for TV serials/ Movies / Actors / Directors with the help of API provided by TMDB.org

- www.ananyarijhwani.com

This website is also built with Laravel 4.2 and basically looks like a static website because it belongs to a wedding photographer and hence show case the photos and videos done by her. The admin panel of the website allows the admin to upload slider images, wedding albums, wedding videos, update and add team members details and control the information shown on different pages.

- www.aamadmipartynews.com

This website is built with wordpress and is a kind of blog where the news about Aam Admi Party are being updated.

- www.asinnetworks.com

This is a website of a SEO company built with wordpress and hence delivers the information about the company.

- www.vigilantepublications.com

Vigilante publications is a book publishing company located in New Delhi it is built with wordpress and delivers the information about the publishing house and their upcoming titles.

- www.applerepairsmbai.com

This website is built with wordpress and delivers the information about the company who deal in repairs of apple products.

- www.goldenpicturehouse.com

This website is built with HTML and CSS only and shares the information about the company.

- www.quickitservice.com

This website is built with wordpress and works like a static website with only providing information about the company.

- www.kullutomanali.com

As the name suggests this website is to arrange tour packages. Built with PHP this website takes in the information of people travelling and forwards the details to admin via email.

- www.himachalmasti.com

Himachal Masti is another website to book tour packages across India they also deal in Bus and Car booking.

- **Android App - Artize**

Artize is a product of Jaquar and the android app showcase their products and share dealer locations etc.

- **Android App - Fuga**

Fuga is a product of an netherlands based company which helps people organise parties.

- **Android App – Accha Khana**

Accha Khana is an android app which helps people order lunch boxes.

Self Summary:

A highly resourceful, innovative, and competent PHP developer with extensive experience in the layout, design and coding of websites specifically in PHP format. Processing considerable knowledge of the development of web applications and scripts using PHP programming languages and MySQL. I am a kind of guy who can take care of huge projects on my own and does not look for a companion to start a project from scratch.

Looking for a suitable developer position with a ambitious & exciting company.
